

## Cable Reels

Auxema Stemmann has more than **50 years of experience** offering fully customized equipments depending on customer individual needs.

We manufacture **3 types of cable/hose reels** depending on the driving system: **manual, counterweight and motor driven cable reels**.

Moreover, we are able to supply from the smallest reels (3-4kg) to reels with **1000-1500m cable capacity and 300mpm driving speed**.

We dispose a testing bench where all our equipment are tested under real running conditions.

**Motor driven cable reels** Motor driven cable reels are classified depending on the motor that it's installed.

- **Mechanical friction clutches** INDARDINAMIK ®
- **Hydraulic clutches**
- **Magnetic clutches** INDAR MAGNETIK ®
- **Electromagnetic clutches** INDAR E-MAGNETIK ®
- **Short -circuit rotor 3- phase induction motors** AS DRIVE ®
- **Wound rotor 3-phase induction motors, as torque motors**
- **Asynronons motor drive by frecuency converters** INDARFREC ® or INDARFREC-BL ®

**Main Consumers:** Big lifting and transport machinery manufacturers, iron and coal mining, coal-fired power stations, cargo and container terminal ports, large electrical installation companies, iron and steel mills,

shipyards.
